Objective

Seeking a part-time role that allows me to apply and further develop my web development skills.Eager collaborator, well-versed in translating concepts into captivating solutions. Seeking a role that nurtures growth, where I can innovate and contribute while adapting to evolving technologies in a dynamic environment.

Experience

- **Gyanmanjari Innovative University**   March 2023 - June 2023
  Web Developer
    - Led creation of an advanced admission software system with specialized panels for seamless application submission, real-time payment tracking, and admin oversight.
    - Designed scalable software architecture using Core PHP, jQuery, Ajax, and MySQL, ensuring smooth integration and cohesive user experience.
    - Oversaw team, conducted meetings, gathered requirements, and managed testing to deliver streamlined admission process.
    - Prioritized intuitive interface for simplified application, document submission, and payments, resulting in positive user feedback.
    - Achieved process efficiency, improved user satisfaction, and empowered administrators through centralized management, showcasing expertise in software architecture and project management.

- **IT DESK INDIA**   Dec 2021 - Feb 2023
  Parttime PHP Tutor-Self Employed
    - I was a committed Part-Time PHP Tutor at IT Desk, combining my passion for education and career guidance to deliver impactful learning experiences.
    - I designed comprehensive curricula that cater to diverse learning styles. By setting clear objectives and weaving real-world examples, I ensure PHP concepts are both understood and applied practically.
    - My teaching approach was dynamic and engaging, utilizing interactive methods like discussions and hands-on exercises. I simplify complex PHP topics through relatable analogies, fostering active participation and comprehension.
    - Beyond teaching, I mentor students to align their strengths with career aspirations. From resume workshops to interview preparation, I equip students with skills for a competitive job market.
    - I presented complex PHP ideas accessibly, using relatable examples and interactive elements. Concise summaries solidify learning, leaving students with a comprehensive understanding.

- **Hyperlink Infosystem**   March 2021 - July 2022
  Php Developer
    - Constructed MySQL databases and developed Node.js APIs for the mobile development team, ensuring seamless data management and communication.
    - Created an efficient Admin Panel and Website using the Laravel PHP framework, enhancing user interface and experience.
    - Collaborated with cross-functional teams to translate business requirements into precise technical specifications.
    - Contributed to the implementation of intricate algorithms and effective problem-solving strategies, enhancing project outcomes.

- **Achintya Labs**   Jun 2020 - March 2021
  Junior Software Developer
    - Spearheaded the development of Websites, APIs, and databases from the ground up, aligning precisely with client requisites and accommodating evolving project needs.
    - Curated and maintained a dynamic product backlog, ensuring continuous alignment with client expectations.
    - Actively contributed to all project phases, from analysis and design to development, ensuring the seamless execution of projects.
    - Pioneered the creation of tailor-made Websites, APIs, and databases, aligning perfectly with client visions and adapting to project evolution.
    - Demonstrated exceptional team leadership, fostering a collaborative atmosphere and effectively

resolving challenges.
- Excelled in client communication, interpreting their needs to deliver personalized and effective solutions.
- Ensured the successful culmination of projects by overseeing deployment stages and delivering compelling project demonstrations.
